5000 SERIES

The Economical Choice

Description

The most popular line of economical, yet dependable, front-to-rear tarp systems, the 5000 Series is available in a wide variety of models, differentiated by cab- or ground-level manual cranks or Durabuilt™ direct-drive motor. All feature zinc-plated steel tubing and easy-to-mount, low-profile flat-coil torsion springs. The zinc coating prevents rust and enhances the 5000 Series professional look.

Distribution and Service on Six Continents!

5000 series

Features

Economical and Reliable The 5000 Series uses a 1-1/4-inch square steel tube pivot arms and bent arms for a lower profile, creating a reliable yet economical choice for any operation.

Pivot Rest Pivot arm rests are standard with the 5000XEL Series. The arm rest creates a steadier arm while in the locked position and helps keep the arm from bouncing during transportation.

Huge Tarp Selection When pricing your 5000 Series system, you will need to order your choice of tarp and add that to the price. Choose from heavy-duty mesh, multicolored PVC mesh, 18-oz. vinyl or asphalt lumite. Asphalt lumite is water resistant and not PVC coated, so it's able to handle much higher heat levels than vinyl. In addition to lumite, other asphalt-friendly selections are also available, including RFL, urethane-coated airbag, 22-oz. vinyl and doloprene. More tarp options can be selected, such as non-standard colors, side flaps, reinforced pockets or hems, webbing, boxed corners, stenciling, grommets and D-rings.

For more information on the 5000 Series, contact your local Shur-Co® dealer or your nearest Shur-Co® location, or visit us online at www.DEBROVYS.com.
